PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate with 14 months of hands-on incident handling and L1/L2 troubleshooting on live POS and back-office infrastructure, including incident prioritisation, network connectivity diagnosis, documentation and escalation. Built and deployed 2 cloud-hosted applications on Firebase (Google ecosystem) with authentication, database, storage and REST API integration. Building foundations in Google Cloud Platform, Azure (AZ-900 in progress), Linux and networking. Seeking an entry-level Cloud Support / Cloud Operations role.

TECHNICAL SKILLS

Cloud Platforms: Google Cloud Platform fundamentals (learning); Firebase (Authentication, Firestore, Realtime Database, Storage, Hosting); Microsoft Azure fundamentals (AZ-900 in progress)
Incident & Support Operations: Incident triage, L1/L2 troubleshooting, prioritisation by service impact, escalation, incident documentation, preventive maintenance, POS and back-office systems
Troubleshooting & Networking: TCP/IP, DNS, DHCP, connectivity diagnostics, hardware, software and peripheral fault isolation
Operating Systems: Windows, Linux fundamentals
Development & Tools: JavaScript, TypeScript, React, Vite, HTML5, CSS3, Tailwind CSS, REST APIs, Git, GitHub, Gemini API, browser developer tools

PROFESSIONAL EXPERIENCE

Technical Support Staff, POS & Systems Maintenance | Domino's Pizza | Jun 2025 - Aug 2026

- Diagnosed and resolved hardware, software, peripheral and network connectivity faults on POS and back-office systems, supporting live daily operations for 14 months.
- Prioritised incidents by service impact and applied a structured troubleshooting sequence, keeping operations staff informed through to resolution.
- Recorded recurring faults and escalated infrastructure and vendor issues with supporting detail, enabling faster handoff.
- Maintained terminals and peripherals through scheduled system checks and preventive maintenance to keep systems available.

Frontend Web Developer Intern | Dream Code | May 2025 - Jul 2025

- Engineered 8+ responsive UI components using HTML, CSS and JavaScript.
- Tested pages and resolved UI defects in collaboration with team members.

TECHNICAL PROJECTS

CareerForge AI | React, TypeScript, Firebase, Gemini AI | careerforge-ai.de5.net
- Designed and built a resume analyzer running 10 ATS-readiness checks, plus a job matcher that surfaces matched skills and missing keywords.
- Integrated 3 Firebase services (Authentication, Realtime Database, AI Logic) to deliver user sign-in, data storage and Gemini-powered features.
- Launched the live app with SEO metadata, sitemap and search-indexing configuration.

Smart Study Assistant | React, Firebase, Gemini API | smartstudyapp-ca670.web.app
- Built a study app that generates summaries and quizzes from notes, including handwritten-note image input.
- Integrated the Gemini API and deployed the live app on Firebase Hosting.

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science | Nazareth College of Arts and Science, Chennai | 2023 - 2026
In progress: Microsoft Azure Fundamentals (AZ-900); Google IT Support Professional Certificate
